

Enterprise Data Management & Business Intelligence: *Improve efficiency and leverage your data*

Finding optimal data warehousing and reporting solutions is an important aspect of streamlining your data flow for increased productivity. The proper Enterprise Data Management (EDM) can assist in integrating your network and helping to empower your ERP and client-side business applications.

At ZSL, we have resource pools of top-notch solution architects with broad industry experience and a depth of skills across a wide array of data warehousing tools. We provide cost effective business solutions for your unique data warehousing scenario.

Our experience spans across the entire spectrum of data warehousing tools

- Data Modeling, Design, and Data Mapping
- Data Mining and Management: SAS Miner, Intelligent Miner, Darwin
- Business Intelligence: Microstrategy, Actuate, Brio, Business Objects, Cognos, Essbase, Hyperion, Metacube, Webfocus, Hummingbird BI Suite
- Data Merging, Migration, ETL (Extraction, Transformation and Load) and DTS (Data Transformation Services): Informatica, Datastage, Datajunction, Trillium, DataFlux, ETI Extract, SAS Warehouse Administrator

- DBMS implementation: Sybase, DB2 UDB, Informix, Oracle, Microsoft SQL server, SQL Plus, and others.
- SAP Business Warehouse Suite and R/3 systems
- Security and Access Control: Each level of data can be secured for access only by the appropriate individuals, from network administrators at one end, to customers at the other.
- Business Impact and Reporting tools: Actuate, Crystal Reports, PRISM, and Cognos ReportNet.

Our Service Offerings include

- End-to-end solutions - Design, Development & Implementation
- Business requirement analysis and data modeling
- ETL architecture and development
- Business Intelligence (BI) & OLAP Solutions
- Data mining
